## IN THE CLAIMS:

1       1. (Previously presented) A filing system for holding a planar object having a planar  
2       object dimension, comprising:

3                   a hanging file folder wherein said hanging file folder has open sides and  
4                   two permanently fixed hangers, wherein said hangers each have midpoints,  
5                   wherein said midpoints are separated by a fixed hanger separation length  
6                   wherein said hanger separation length is less than half a standard letter  
7                   sized hanger separation length wherein said hanging file folder has a  
8                   hanging file folder length that is slightly smaller than said fixed hanger  
9                   separation length; and

10                  a removable protective envelope having a removable protective envelope  
11                  length, wherein said hanging file folder is sized for holding said removable  
12                  protective envelope, wherein said hanging file folder length about matches  
13                  said removable protective envelope length, wherein said removable  
14                  protective envelope is sized for holding the planar object, and wherein said  
15                  removable protective envelope length about matches the planar object  
16                  dimension.

1       2. (Currently amended) A filing system as recited in claim 1, wherein said hanger  
2                  separation length is in the range of about 1 1/2 inches to about 7 inches.

1       3. (Currently amended) A filing system as recited in claim 1, wherein said hanger  
2                  separation length is in the range from about 5 1/4 inches to about 5 3/4 inches.

- 1        4. (Original) A filing system as recited in claim 1, wherein said hanging file folder  
2                has a vertical dimension less than 8 inches.
  
- 1        5. (Currently amended) A filing system as recited in claim 4, wherein said vertical  
2                dimension is in the range from about 4 7/8 inches to about 5 1/2 inches.
  
- 1        6. (Currently amended) A filing system as recited in claim 5, wherein said vertical  
2                dimension is in the range from about 5 inches to about 5 3/8 inches.
  
- 1        7. (Previously presented) A filing system as recited in claim 1, further comprising  
2                said planar object, wherein said protective envelope holds said planar object  
3                within said hanging file folder.
  
- 1        8. (Original) A filing system as recited in claim 7, wherein said protective envelope  
2                is approximately square.
  
- 1        9. (Original) A filing system as recited in claim 7, wherein said protective envelope  
2                has an envelope length of about 5 inches and an envelope width of about 4 7/8  
3                inches.
  
- 1        10. (Currently amended) A filing system as recited in claim 7, wherein said protective  
2                envelope has an envelope length, wherein said hanger separation length is longer  
3                than said envelope length by an amount in the range from about 1/8 inch to about  
4                2 inches.
  
- 1        11. (Previously presented) A filing system as recited in claim 7, wherein said hanging  
2                file folder is for holding a plurality of said planar objects, each in its own said  
3                protective envelope.

- 1 12. (Previously presented) A filing system as recited in claim 7, wherein said
- 2 protective envelope is for holding only one said planar object.
- 1 13. (Original) A filing system as recited in claim 7, wherein said protective envelope
- 2 includes a transparent portion.
- 1 14. (Previously presented) A filing system as recited in claim 7, wherein said planar
- 2 object includes a memory storage device.
- 1 15. (Previously presented) A filing system as recited in claim 14, wherein said
- 2 memory storage device comprises at least one from the group including an optical
- 3 disk, a disk, a digital video disk, and a magnetic storage disk.
- 1 16. (Original) A filing system as recited in claim 14 wherein said hanging file folder
- 2 further comprises a printed insert piece with information corresponding to said
- 3 memory storage device.
- 1 17. (Original) A filing system as recited in claim 1, wherein said hanging file folder
- 2 further comprises an identifying tab and label.
- 1 18. (Withdrawn) A filing system as recited in claim 1, further comprising a box for
- 2 holding a plurality of said hanging file folders.
- 1 19. (Withdrawn) A filing system as recited in claim 18, wherein said box includes a
- 2 pair of parallel rails for supporting said hangers.

- 1 20. (Withdrawn) A filing system as recited in claim 19, wherein said box has a
- 2 dimension sufficient for supporting letter or legal sized hanging file folders,
- 3 wherein said box includes at least four parallel rails for supporting at least two of
- 4 said hanging file folders in space of a single standard letter or legal sized folder,
- 5 wherein each said hanging file folder is separately removable.
- 1 21. (Withdrawn) A filing system as recited in claim 20, wherein said box includes a
- 2 retaining bar for locking said hanging file folders in place during transport.
- 1 22. (Withdrawn) A filing system as recited in claim 21, wherein said retaining bar
- 2 includes a pliable material member.
- 1 23. (Withdrawn) A filing system as recited in claim 21, wherein said box includes a
- 2 box cover, wherein said retaining bar is attached to said box cover.
- 1 24. (Withdrawn) A filing system as recited in claim 21, wherein said box includes an
- 2 elastic member for holding said hanging file folders in place during transport.
25. Cancel
26. Cancel

1 27. (Withdrawn) A filing system for holding an array of small planar objects having a  
2 first dimension and a second dimension perpendicular to said first dimension, the  
3 filing system comprising:

4 hanging file folders having open sides and include hangers that are  
5 permanently fixed to said hanging file folders, wherein said hangers have a  
6 fixed spacing there between that is no more than 2 inches larger than said  
7 first dimension, and wherein said hanging file folders have a vertical  
8 dimension that is no more than 2 inches larger than said second dimension,  
9 wherein each said hanging file folder is for holding one or more of the  
10 planar objects; and

11 a box including a pair of rails for supporting said hanging file folders,  
12 wherein said box has a first dimension equal to that for supporting  
13 standard letter size hanging file folders or a first dimension equal to that  
14 for supporting standard legal sized hanging file folders, wherein said box  
15 includes four parallel rails for supporting two of said hanging file folders  
16 in space of a single letter or legal sized folder, wherein each said hanging  
17 file folder is separately removable.

28-37. Cancel

1 38. (Previously presented) A filing system as recited in claim 1, wherein the planar  
2 object is subject to damage from at least one from the group including scratches  
3 and fingerprints, wherein said removable protective envelope provides the planar  
4 object with protection from said damage.

1       39. (Previously presented) A filing system as recited in claim 1, wherein said hanging  
2       file folder has a hanging file folder width, said removable protective envelope has  
3       a removable protective envelope width, and the planar object has a second planar  
4       object dimension, wherein said protective envelope width about matches said  
5       second planar object dimension, wherein said hanging folder width about matches  
6       said removable protective envelope width.

1 40. (Previously presented) A filing system, comprising:

2 a hanging file folder wherein said hanging file folder has open sides and  
3 two permanently fixed hangers, wherein said hangers each have midpoints,  
4 wherein said midpoints are separated by a fixed hanger separation length  
5 wherein said hanger separation length is less than half a standard letter  
6 sized hanger separation length, wherein said hanging file folder has a  
7 hanging file folder length that is slightly smaller than said fixed hanger  
8 separation length and wherein said hanging file folder has a hanging file  
9 folder vertical dimension; and

10 a removable protective envelope having a removable protective envelope  
11 length and a removable protective envelope vertical dimension, wherein  
12 said hanging file folder is sized for holding said removable protective  
13 envelope, wherein said hanging file folder length about matches said  
14 removable protective envelope length and wherein said hanging file folder  
15 vertical dimension about matches said removable protective envelope  
16 vertical dimension;

17 a planar object having a planar object length and a planar object vertical  
18 dimension wherein said removable protective envelope is sized for holding  
19 said planar object, wherein said removable protective envelope length  
20 about matches said planar object length and wherein said removable  
21 protective envelope vertical dimension about matches said planar object  
22 vertical dimension.

- 1 41. (Previously presented) A filing system as recited in claim 40, wherein said planar
- 2 object is subject to damage from at least one from the group including scratches
- 3 and fingerprints, wherein said removable protective envelope provides the planar
- 4 object with protection from said damage.
  
- 1 42. (Currently amended) A filing system as recited in claim 41, wherein said hanger
- 2 separation length is in the range from about 5 1/4 inches to about 5 3/4 inches and
- 3 said vertical dimension is in the range from about 5 inches to about 5 3/8 inches.
  
- 1 43. (Previously presented) A filing system as recited in claim 42, wherein said
- 2 protective envelope has an envelope length of about 5 inches and an envelope
- 3 width of about 4 7/8 inches.
  
- 1 44. (Previously presented) A filing system as recited in claim 40, wherein said
- 2 hanging file folder holds a plurality of protective envelopes and wherein said each
- 3 said protective envelope holds at most one said planar object.
  
- 1 45. (Previously presented) A filing system as recited in claim 40, wherein said
- 2 protective envelope includes a transparent portion.
  
- 1 46. (Withdrawn) A filing system as recited in claim 40, further comprising a box for
- 2 holding a plurality of said hanging file folders, wherein said box includes a pair of
- 3 parallel rails for supporting said hangers.
  
- 1 47. (Withdrawn) A filing system as recited in claim 46, wherein said box has a
- 2 dimension sufficient for supporting letter or legal sized hanging file folders,
- 3 wherein said box includes at least four parallel rails for supporting at least two
- 4 rows of said hanging file folders in space of a single row of standard letter or legal
- 5 sized folders, wherein each said hanging file folder is separately removable.

1 48. (Withdrawn) A filing system as recited in claim 46, wherein said box includes a  
2 system for holding said hanging file folders in place during transport.

3 49. (Withdrawn) A filing system, comprising:

4 at least four parallel and coplanar rails, wherein said at least four parallel  
5 and coplanar rails include in order a first rail, a second rail, a second to last  
6 rail, and a last rail, wherein spacing from said first rail to said last rail is  
7 equal to standard letter sized rail spacing or standard legal sized rail  
8 spacing;

9 a first hanging file folder mounted on said first rail and on said second rail;  
10 and

11 a second hanging file folder mounted on said second to last rail and on  
12 said last rail.

1 50. (Withdrawn) A filing system as recited in claim 49, further comprising:

2 a first removable protective envelope, wherein said first hanging file folder  
3 holds said first removable protective envelope; and

4 a second removable protective envelope, wherein said second hanging file  
5 folder holds said second removable protective envelope.

1 51. (Withdrawn) A filing system as recited in claim 50, wherein said first hanging file  
2 folder includes a plurality of said removable protective envelopes.

1 52. (Withdrawn) A filing system as recited in claim 50, wherein said first hanging file  
2 folder has a dimension about matching a dimension of said first removable  
3 protective envelope.

1       53. (Withdrawn) A filing system as recited in claim 52, further comprising a planar  
2       object, wherein said first removable protective envelope has a dimension about  
3       matching a dimension of said planar object, and wherein said first removable  
4       protective envelope holds said planar object.
